Will the district consider moving magnet programs (such as that at SW Dekalb HS which isn't full) or Arabia Mtn (which isn't in a centralized location) to a more central location within the District in order to capture more students. This of course would open spaces at both locations for neighborhood school students.		The District is considering several options. Please join us for the September Regional Town Hall meetings to provide feedback on the options and recommendations.
3 schools SPLOST V renovations have been deferred, but this presentation states they are not deferred. Are those projects deferred?		The label of "Deferred" in the E-SPLOST Monthly Status Report for the renovation projects at Henderson Mill ES, Livsey ES, and Toney ES was a miscommunication which will be corrected on the next MSR. These projects are not "Deferred to E-SPLOST VI" as were the new construction projects from E-SPLOST V.
Are you able to provide a status report on the leaking roof issue at Oakview ES and drain/standing water issue by the gym at Snapfinger ES? Thanks. I appreciate a response to both.		For Oakview ES: For Snapfinger ES: We are contracting services to modify the in-ground storm drain to allow easier outflow, as well as lift the sidewalk so that water can reach the drain without flowing over the sidewalk.
Why haven't you responded to any of the feedback since April? There are lots of questions and concerns. Read the letter from the Lakeside PAC. Is the District planning to redistrict based on grossly overcrowded high schools and grossly undercrowded high schools, and/or the addition/removal of school choice programs within neighborhood schools?		The CMP team will be conducting meetings with PACs in the next weeks to gather feedback on reports, options, and recommendations. The District is considering several options. Please join us for the September Regional Town Hall meetings to provide feedback on the options and recommendations.
What are the district's goals for the CMP? We know what Perkins and Will received as stakeholder feedback, but we have not heard from the administration?		The District is considering several options. Is the CMP seeking to "BALANCE" work between regions? Or truly address overall needs within the entire district? Obviously there are schools district wide that need improvements, but there are many areas of DCSD that need a gross amount of improvements via the CMP. How will the district handle this?		The District is considering several options. Please join us for the September Regional Town Hall meetings to provide feedback on the options and recommendations.
Is one of the priorities of the CMP to address the inequity in facilities between clusters?		The District is considering several options. Please join us for the September Regional Town Hall meetings to provide feedback on the options and recommendations.
Lithonia MS ESA shows a 5 out of 5 for its track and for its tennis. How can that be if they are in disrepair?	Thank you, understood about Lithonia MS. (Posted by stakeholder Drew Kelly, in response to verbal answer)	The rubric for the ESA's and FCA's and the revised reports will be recalibrated and updated on the CMP website in the coming weeks. It is our goal to have these fully updated before the September Town Hall meetings.
Why can't some school buildings serve as community centers for those areas with no Rec Centers nearby? Schools can stay open after classes are over to offer this service to the community.		The District is considering several options. Please join us for the September Regional Town Hall meetings to provide feedback on the options and recommendations.
I was thinking about what Nancy said. If a 5 of 5 is considered "top" why would it need to be repaired, OR how is that assessment so far off?		The rubric for the ESA's and FCA's and the revised reports will be recalibrated and updated on the CMP website in the coming weeks. It is our goal to have these fully updated before the September Town Hall meetings.
The scale for the ESA is 1-5. Schools get a 1 even if something is missing. How is that accurate?
