

Summary of Instructional Resources

Greetings Parents and Community,

This webpage of instructional resources has been developed to support parents in the critical role of extending the instructional experience beyond the classroom as we work collaboratively to ensure all students are successful on the new Georgia Milestones. Please know that the instructional resources on this webpage include the following:

1. Georgia Milestones Presentation (Presented in September 2014)
2. Formative Assessment Resources
3. Resources from the Georgia Department of Education and other states

The DeKalb County School District is working diligently to ensure all students are trained in the use of thinking skills in all content areas and prepared to successfully respond to extended-response and constructed response items. Please contact your child's school for specific information relative to instructional expectations and the use of these resources.
