

A Community Family

Oakcliff is more than a school it's a family.

Every Oakcliff student can rely on a network of caring adults both within the school and in our surrounding community to help them grow and develop academically, socially, and emotionally.

Parents: As a part of the theme school concept, all parents must be actively engaged in every aspect of school life.

Partners: Additionally, we have strong partnerships with local businesses, schools, colleges, and government institutions that provide modeling and mentorship for our students throughout the school year.

A Dekalb County School of Choice

An AdvancEd (now Cognia) STEM-Certified School

What does being an AdvancEd (now Cognia) STEM-Certified school mean?

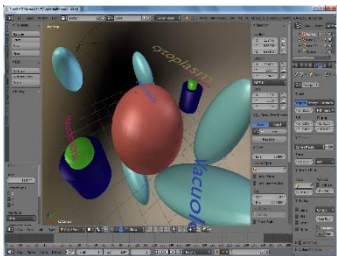

Attending an AdvancEd STEM Certified School means your child will engage regularly in working collaboratively with other students to design and create innovative solutions to real-world problems using the Engineering Design Process.

Curriculum across all subject areas is driven by a real-world challenge that is aligned with the Dekalb County curriculum.

Students learn how to use 21st century technology, tools, and software along with the Oakcliff Engineering Design Process to complete STEM challenge units in every class and across every subject.

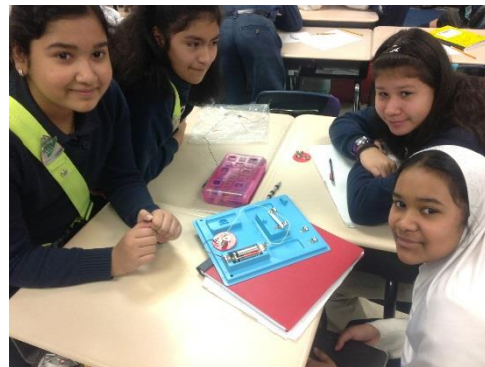

Just a few of the many reasons to choose Oakcliff

A Dedicated MakerSpace

Students create and innovate using the engineering design process while gaining practical skills with hands-on tools and materials in our dedicated MakerSpace.

A Dedicated Science Lab

Classroom Science instruction is further enriched with our weekly Science Lab.
