## Summary of Public Input on Proposed Options

| Round 3 Public Meetings |
| :---: |
| Round 3 Online Survey |
| Position Statements of School Councils, PTAs and Foundations |

## 1. Round 3 Public Meetings:

| Conducted: | August 23, 2016 at Clarkston High School <br> August 25, 2016 at Cross Keys High School |
| :--- | :--- |
| Participants: | Clarkston $=239$, Cross Keys $=438$ |
| Total $=677$ |  |

Option Preferences:

## Key Takeaways (Facilitator recorded):

> Parents want capacity issue addressed and facilities upgraded - not a Band-Aid.
$>$ Cost is a concern, but should not preclude finding a reasonable solution to capacity needs.
> Parents want to know specifics of who will be redistricted.
> Parents want to know impact on elementary schools.
> Traffic impact, especially pertaining to Briarcliff site, is a concern.
> Majority of parents are opposed to moving successful magnet programs, but others indicate support for more centralized program, or expanding magnets to more schools.
> Option C might have more support if sites are named where magnets would move.
> Concern about impact on property values and, especially, keeping communities intact.
> Concern that DCSD will work proactively with DeKalb/municipal governments on whatever plan is adopted.
> Some support for developing one or more new options, including rebuilding Cross Keys HS on current site.

## 2. Round 3 Online Survey:

Conducted:
Responses:

August 23, 2016 through Sept. 16, 2016 (English \& Spanish)

Option Preferences (see Appendix A \& B for details):

## Key Takeaways:

> The survey results show an overall preference for B ( 51 percent) over Option A ( 45 percent) and Option C (4.5 percent).
> Chamblee ( $30 \%$ ) and Dunwoody ( $32 \%$ ) combined provided 62 percent of the responses, followed by Lakeside ( $15 \%$ ) and Cross Keys ( $14 \%$ ).
> The most important factor cited by all schools - even those preferring for Option B - is keeping one-to-one feeder patterns.
> The next most important factor cited by all schools is the number of student moves.
> The Chamblee community's support for Option A is based primarily on two factors: 1) Keeping magnet programs in place, and 2) Keeping one-to-one feeder patterns.
> The Dunwoody community's support for Option B is based on a strong desire to keep the Dunwoody community intact (under Option A, some students likely would be redistricted out of Dunwoody if a new high school cluster is created). They would prefer to see an addition built on Dunwoody HS, and many expressed support for a new option that keeps the Dunwoody community intact, keeps one-to-one feeder patterns, and includes an addition on Peachtree MS.
> Cross Keys prefers Option B because that option would build a new Cross Keys High School. They expressed concerns about the cost of Option A and the uncertainty of finding land for a new high school under that option.
> Lakeside is fairly balanced between supporting Option A and Option B - no dominant preference - but also expressed a strong desire to maintain one-to-one feeder patterns, and keep the Lakeside community intact if possible.
> Many of those supporting Option A believe it to be a better long-term solution for the school district because it provides the most additional seats.
> Many of those supporting Option B believe it to be the least disruptive solution for families because it requires fewer student moves and keeps school communities more intact.
> Some respondents who preferred Option A indicated they would have preferred Option B if not for the one-to-one issue.
> While not necessarily opposed to the idea, many expressed concerns about using the Briarcliff site for a middle school or a high school. Those concerns are related to traffic congestion primarily, but also to distance of travel to the school, student safety, and the possibility of the property being annexed by the city of Atlanta.
> There is little support for Option C or moving the Chamblee magnet programs.

## 3. Position Statements of School Councils, PTAs and Foundations:

Conducted: Submitted by letter Sept. 12-Sept. 18, 2016

## Participants and Option Preferences:

| Organization | Cluster | Summary |
| :---: | :---: | :---: |
| Ashford Park ES PTA, School Council, APSEF | Chamblee | Supports a modified Option B (do not create a new cluster) with a new high school near the existing Cross Keys HS property, by leveraging the existing Briarcliff property; keep magnet at Chamblee MS/HS. |
| Briarlake ES School Council \& Parent Leadership | Lakeside | Opposes split feeders. |
| Briar Vista ES School Council \& PTO | Druid Hills | Endorse Option D as proposed by Druid Hills MS/HS. Opposes split feeders. Does not want a new cluster in Region 1. |
| Brockett ES School Council | Tucker | Endorses Option A since it preserves community ties (no split feeders). |
| Chamblee HS Governing Board and Chamblee MS PTSA | Chamblee | Opposes moving the magnet programs (diversity matters). Consider two new high schools and mitigate risks of annexation of Briarcliff site. Concern about distance from students to Sequoyah MS. Create a modified option that addresses stated concerns. |
| Cross Keys Foundation, Inc. | Cross Keys | Provides 5 guiding principles and 6 assertions. Recommends an Option D, with a new Cross Keys HS near the current site. Sequoyah MS should feed Chamblee MS. Keep magnet in Chamblee cluster. Keep Clarkston cluster whole. |
| Cross Keys HS School Council | Cross Keys | Supports Cross Keys Foundation statement. |
| Clarkston HS PTA | Clarkston | Provides concerns of existing school and supports Option A. |
| Clarkston HS School Council | Clarkston | Provides concerns of existing school and supports Option A. |
| Dunwoody HS School Council | Dunwoody | Supports modified Option B, with an addition to Peachtree MS (in addition to Dunwoody HS) to avoid split feeders. |
| Druid Hills MS/HS School Council | Druid Hills | Does not want split feeders, nor creation of a new cluster in Region 1. Recluster linear Cross Keys. Supports a modified Option B. Recommends leveraging Briarcliff HS (but not the stadium) to build a high school closer to Brookhaven. |
| Huntley Hills ES Council, PTA, Foundation | Chamblee | Supports reclustering Cross Keys and Chamblee into north-south areas. New high school at the Briarcliff site (for Cross Keys). No additional cluster. |
| Kingsley ES PTO | Dunwoody | Recommends swapping Peachtree MS and Dunwoody HS and merge Chesnut and Kingsley and use Chesnut property to add to high school property (formerly Peachtree MS). |
| Kittredge ES Magnet School | Chamblee | Does not support any options. Any proposal to move the magnet should look at diversity and centralization. |
| Lakeside Cluster Summit | Lakeside | No consensus from Lakeside cluster, but provides a "thought paper," that supports not losing any students from the cluster and "provisional" support for a 750+ seat Lakeside if it is feasible. Provides creative ideas for Lakeside HS, including off-site 9th grade academy. |
| Montgomery School Council | Chamblee | Supports a new cluster (Sequoyah area) and re-building of Cross Keys HS. Sell Briarcliff land to support new schools. Keep magnet program at Chamblee. Provides a recommendation that is very similar to Option A. |
| Peachtree MS Foundation | Dunwoody | Supports Dunwoody HS statement. |
| Redan MS School Council | Redan | Supports Option C. |
| Sequoyah MS School Council | Sequoyah | Supports Cross Keys Foundation statement. |

## Appendix A:

Online Survey conducted August 23 - Sept. 16, 2016
Summary of Results

| Cluster |  | Respondent Type |  |  |  |  |  |  | $\stackrel{E}{\Xi}$ | Option Choice |  |  |  | Most Important Factor for Choice |  |  |  |  |  |  |
