Keep Ashford Park Community /Cluster together	12
Fernbank parents will have more access to the schools.	
Feeder Alighnmnet only calls for 22 HS students	
85 remains boundary for HS & MS	
New School Building	
Bring students to all the schools that may not have attending currently	
Kept most of Drew Valley in Ashford Park	
Area C is together specifically Tanlewood in JLES	
Area C is together specifically Tanlewood in JLES	
Keeping community together	
The students from JLES benefit from the new school which is a possible change	
because most students of current JLES live along Buford Hwy	
Pro: Traffic flow & safety is positively impacted by this plan on S. Bamby Lane	
which is a cut through street in route to APES	
Listened to to parents about concerns	
The ES redistricting plan presented is a logical cohesive area that does a great job bringin in students from close proximity to JLES. Its perfect however maybe it doesn't go far enough at only 94% capacity. Consider adding students from Drew Valley Rd NE, Carlton PL, S Bamby Ln, Archwa Dr & Mannville Dr within short walking distance. Keep it the same but add those for nearest streets.	
Thank you for listening to comments of keeping homes north of Dresden in AP	
Thank you for listening to our feedback and the minimal impact to AP.	
I was very pleased that this plan considered the prior feedback and took concrete steps to address that feedback. The traffic safety concens in AP north of Dresden concerns of the Tanglewood parents and German Immersion were all addressed. Great plan and thank you.	
The changes are very positive for the students currently @ JLES	
Traffic patterns for car riders in Area A is positive	
I realize that to someone who doesn't know where neighborhoods begin & end this	
SRP may look suspect in areas. If you know the communities & the neidhborhoods,	
the map makes sense. Additionally adding Section C is making JLES more diverse	
by adding more caucasian students.	
15 kids in Tanglewood Circle and Gregory Run will get to go to the new John Lewis	
elementary school.	
Addresses overcrowding in CK cluster elementary schools and also keeps	
neighborhoods mostly intact.

Does a great job of implementing the sentiment of the public comments from	
rounds 1 and 2. In particular, this plan solves many of the traffic/safety problems	
and other issues with the options presented in round 2. Another important pro:	
Keeps S. Bamby, Carlton and Skyland (which are within Ashford Park neighborhood)	
in Ashford Park Elementary.	
geography. not shifting anymore to ashford park as it is already going to be	
overcrowded in 2 years or less.

Keep Ashford Park Community /Cluster together	12
Good for Tanglewood/Gregory Run Clairmont Terrace	
Good for the community/ overcrowding at schools	
Good job keeping most of the communities together. There is relief to the	
overcrowded schools and a lot of trailers are being removed.	
Great plan. Good job incorporating public input from last sessions. Please make	
sure to keep that input in mind moving forward.	
Great Plan. neighborhoods intact are great! The plan designers really listened to	
the community.	
I am happy with this plan as it relieves overcrowding in Woodward and Montclair,	
while also adding families to JLES who want to be there, be involved, and make the	
school the best it can be. I also like that there is minimal impact to Ashford Park	
Elementary's attendance zone.	
I heartily agree with the staff recommended plan because of the current traffic	
patterns on Clairmont Road. John R. Lewis egress to John R. Lewis is much safer for	
both the parents and the students. Currently being district ed for Montclair	
requires parents and students to take their life in their hands trying to take a left	
onto Clairmont Road.	
I like that it keeps the Ashford Park community together	
I love that Ashford Park and the majority of drew valley neighborhoods are	
together. We are a unified group! Thanks for keeping that! This leaves most of	
the space for the schools that are so overcrowded to receive seats at JLE.	
I love that Tanglewood Circle, Gregory Run, and Clairmont Terrace have been	
included in this plan. It is incredibly convenient for us and makes most sense for	
our neighborhoods.	
I really like how Staff listened to input. Brookhaven Renaissance and Ashford Park	
Neighborhood streets remain part of the Ashford Park&Chamblee clusters. This	
decision allows John Lewis Elementary to relieve overcrowding in the Cross Keys	
cluster. Plus, the German Immersion remains at Ashford Park.	
I support the proposed new map as is. Keeps Ashford Park and Drew Valley	
community together and is consistent with the original intention of the new school	
to help overcrowding at Dresden Montclair and Woodward.	
I support the staff recommended plan because I truly feel the staff listened to the	
community of Ashford Park and Drew Valley's concerns to remain together. I love	
the idea of a community school for our children and the staff plan is supports this	
idea. I also think the relief of overcrowding in other schools was accomplished as	
well.	

I think it accomplishes relieving overcrowding and reducing portables at Montclair and Woodward. It also sets up John Lewis for great success by putting families there who want to be there. It also leaves intact neighborhoods of Drew Valley and Ashford park. I think that the plan looks fine. I think that the plan looks fine. I think the staff really listened to the feedback during sessions 1 & 2 and provided a great solution with the intact neighborhood concerns from both Ashford Park and our NEIGHBORHOOD area C! We want to remain intact and bet a part of the new John lewis school. Also this plan utilizes proximity and safety in the new lines and feeder lines. I think this is a good plan. I'm happy with this plan, as it keeps the Ashford Park community intact. In favor of the current plan. Brookhaven Renaissance and Ash Park neighborhood streets remain part of the Ashford Park / Chamblee cluster. JLES will fufill the promise to relieve overcrowding in Cross Keys cluster. In favor of the new plan. Brookhaven Renaissance community and Ashford Park neighborhood streets remain part of the Ashford Park and Chamblee cluster. JLES fufilish the promise relieve overcrowding in Cross Keys cluster. German immersion program remains at APS. In support of the staff recommended plan, as DCSD listened to neighborhood input. Brookhaven Renaissance and Ashford Park neighborhood streets remain part of the Ashford Park / Chamblee cluster. JLES fufills the promise to relieve overcrowding in Cross Keys cluster. Additionally, German Immersion stays within APS. Increased neighborhood & community representation from previous districting recommendations. It is OK to keeps the Ashford Park Elementary School attendance zone intact as much as possible. I feel like the staff did a great job of hearing our concerns and addressing them. It looks like a fair distribution that makes sense. I am very pleased that this recommendation will allow my son and his brother to continue in the school that we love with the community we love.	John R. Lewis Elementary Redistricting Community Feedback	
Keep Ashford Park Community /Cluster together 12 I think it accomplishes relieving overcrowding and reducing portables at Montclair and Woodward. It also sets up John Lewis for great success by putting families there who want to be there. It also leaves intact neighborhoods of Drew Valley and Ashford park. I think that the plan looks fine. I think that the plan looks fine. I think the staff really listened to the feedback during sessions 1 & 2 and provided a great solution with the intact neighborhood concerns from both Ashford Park and bour NEIGHBORHOOD area C! We want to remain intact and bet a part of the new John lewis school. Also this plan utilizes proximity and safety in the new lines and feeder lines. I think this is a good plan. I'm happy with this plan, as it keeps the Ashford Park community intact. In favor of the current plan. Brookhaven Renaissance and Ash Park neighborhood streets remain part of the Ashford Park / Chamblee cluster. JLES will fufill the promise to relieve overcrowding in Cross Keys cluster. In favor of the new plan. Brookhaven Renaissance community and Ashford Park neighborhood streets remain part of the Ashford Park and Chamblee cluster. JLES fufillist the promise relieve overcrowding in Cross Keys cluster. German immersion program remains at APS. In support of the staff recommended plan, as DCSD listened to neighborhood input. Keeps APE community together	
Keeps APS Families together that have worked so hard to make a better school and	
we are no in the top 50.	
Keeps as many current families at their current schools as possible	
Keeps Ashford Park current student intact. Makes sense geographically.	
Keeps current Ashford Park community together. Relieves overcrowding at Cross	
Keys cluster elementary schools.	
Keeps most of APES together.	
keeps most of current neighborhoods intact	
Keeps my neighborhood the same.	
Keeps neighborhoods in tact.	
Allows Tanglewood Circle neighborhood to attend JLE	
Relieves overcrowding at several schools	
keeps neighborhoods intact	
Keeps neighborhoods intact, limits traffic congestion and safety issues for children	
crossing major roads, preserves special programs such as German immersion and	
feeder schools, addresses instructional capacity and overcrowding, and allows for	
future increased enrollment	
Keeps neighborhoods intact, specifically Ashford Park areas north of Dresden and	
Tanglewood/Gregory Run/Clairmont Terrace communities. Keeps Tanglewood	
community IN the new school which we are VERY excited about - these Parents are	
COMMITTED to making this school amazing and are already forming committees to	
help do so!	
Keeps neighborhoods much more intact than prior plan versions. Good job and	
much improved! Keeps the Ashford Park neighborhood intact, eliminates the need for flow of	
students across busy Dresden Drive for kids to get from Ashford Park neighborhood	
to the new John Lewis ES, keeps the Clairmont Terrace neighborhood intact, relieves overcrowding at most area elementary schools, allows German Immersion	
kids to stay together at Ashford Park.	
Keeps with original intent of reducing overcrowding at several elementary schools.	
Kept neighborhoods intact. Drew Valley/Brookhaven Heights/Ashford Park are one	
big neighborhood! Prevented Drew Valley from undergoing ANOTHER redistricting	
as they already went through that in 2006. Removed major safety hazard of having	
traffic coming in AND out of S. Bamby by keeping them in APES. Brookhaven	
Renaissance stays in APES.	
Largely keeps existing districts in-tact. Small number of students are moved.	

Redistricted areas will provide relief for the areas that are the most over crowded ES's in the area. Redistricting Tanglewood circle and Gregory Run to John Lewis is an excellent idea. The turn onto Clairmont to the right is much safer for all concerned especially the bus.	John R. Lewis Elementary Redistricting Community Feedback	
Keep Ashford Park Community /Cluster together 12 Limited disruption to current districts		
Keep Ashford Park Community /Cluster together Limited disruption to current districts Minimal disruption to existing Ashford Park / Chamblee Charter cluster. Excellent job keeping kids together with their friends. Minimal impact to Ashford park families. Minimal impact to Ashford park families. Minimal impact to Ashford park families. Minimal impact to Ashford Park. Minimal impact to Ashford Park. Minimal impact to Ashford Park own. Neighborhoods appear to be kept in tact as best as possible with little impact to strong community at Ashford Park. Offers new facilities for overcrowded Cross Keys Cluster of school zones. However, it is not an accurate representation of the actual neighborhood it is in. Studies have shown new facilities w/o curriculum changes and parent involvement will fail. For this reason more of APS should be incorporated in the redistricting. Overall, I believe the plan seems to be well thought out Plan appears to limit the number of existing Ashford Park students that will have to switch schools Please keep Brookhaven Renaissance community districted for Ashford Park. Provides additional instructional capacity in an underserved and growing geographic area Proximity to of students to the school they will attend. Proximity, ease of access to the new school, good mix of students and well-trained faculty at a new school Putting Tanglewood Circle & Gregory Run into the John R Lewis catchment area will be great for proximity and traffic flow and allow for the greatly increased amount of new enrollment kids (a dozen in age 0-4) in those streets who will start school soon. It will keep the neighborhood cohesive. Really listened to the community about keeping neighborhoods and programs together while easing overcrowding at the desired schools Redistricted areas will provide relief for the areas that are the most over crowded ES's in the area. The turn onto Clairmont to the right is much safer for all concerned especially the bus.		Dots
Limited disruption to current districts Minimal disruption to existing Ashford Park / Chamblee Charter cluster. Excellent job keeping kids together with their friends. 	Relieves over crowding in cross keys cluster	

John R. Lewis Elementary Redistricting Community Feedback	
Meeting 3: November 27, 2018 7:00pm (Cross Keys HS)	
Staff Recommended Plan - Pros	
Comment	Dots
Keep Ashford Park Community /Cluster together	12
Relieves overcrowding for Cross Keys Cluster of elem school attendance zones.	
Projected enrollment for JRLES keeps instructional capacity below max (100%)	
offering a premium learning environment, yet is inefficient. Keeps AP in tact @	
MS/HS level (except for sect H; should delay move to keep neighborhood intact	
until new Cross Keys MS/HS open)	
Relieves overcrowding for Cross Keys Cluster of elem school attendance zones.	
Projected enrollment for JRLES keeps instructional capacity below max (100%)	
offering a premium learning environment, yet is inefficient. Keeps AP in tact @	
MS/HS level (except for sect H; should delay move to keep neighborhood intact	
until new Cross Keys MS/HS open)	
Relieves overcrowding for Cross Keys Cluster of elem school attendance zones.

offering a premium learning environment, yet is inefficient. Keeps AP in tact @	
MS/HS level (except for sect H; should delay move to keep neighborhood intact	
until new Cross Keys MS/HS open)	
Relieves overcrowding for Dresden and Montclair elementary schools.	
relives overcrowding for schools along Buhi	
Skyland Estates community would benefit by utilizing a brand new facility at JLES.	
Tanglewood / Gregory Run is included, makes more sense to have kids close to	
their school. Traffic patterns make sense.	
Tanglewood / Gregory Run is included, makes more sense to have kids close to	
their school. Traffic patterns make sense.	
Tanglewood Circle, Gregory Run and Clairmont Terrace are included in the new JR	
Lewis plan. Traffic wise this makes a lot of sense.	
thank you for including tanglewood and clairmont terrace in john lewis district. we	
are in support of this recommended plan.	
Thank you for leaving Drew Valley in the Ashford Park attendance zone. I know that	
was very important to many of our parents.	
Thank you to DCSD listening to input to leave Brookhaven Renaissance and Ashford	
Park neighborhood streets remaining as part of the Ashford Park / Chamblee	
cluster. With this plan, JLES fulfills the promise to relieve overcrowding in Cross	
Keys cluster and German Immersion students in Brookhaven Renaissance stay at	

APS.

Comment	Dots
Keep Ashford Park Community /Cluster together	12
The local neighborhood in which JRLES resides is under-represented (map sect A) with the proposed attendance lines by drawing only 20 local students into this	
brand new school. Continue to feed and relieve overcrowding from BuHi schools	
(wakefield forest, tanglewood, etc), but find a way to bring more students within 1	
mile in.	
The plan is great for traffic on Dresden Drive. Safer traffic flow. It is great as far as nstructional capacity, as well. Cross Keys is less crowded. Intact neighborhood issues have mostly been addressed, even though I am aware of the communities south of Dresdens displeasure. Other than that, the plan makes sense.	
The staff recommended plan presents a cohesive mapped community that keeps communities together. Thank you for listening and responding to previous feedback!	
They did a good job of keeping the community together, with the challenge of	
redrawing around a new school located within existing attendance zones. Tough to	
do and impossible to keep all citizens in their existing zones. but I feel they did a	
good job of listening to the community. Also, minimizing disruption in feeder	
patterns was positive This plan keeps the Dresden Creek townhome community a part of the Ashford	
This plan keeps the Dresden Creek townhome community a part of the Ashford Park school cluster. It keeps the original AP community intact, for the most part.	
This is a a rich and vibrant community focused on supporting the students,	
teachers, and school.	
This plan keeps the Drew Valley and Ashford Park neighborhoods in tact while also	
allowing my children to continue in the German Immersion program without any	
disruption. We rely on bus every day.	
Additionally, the staff plan addresses the most important issues of overcrowding	
within the Cross Keys Elementary Schools.	
This plan relieves overcrowding at Woodward and Montclair, while also adding	
families to JLES who want to be there, be involved, and make the school the best it	
can be. I also appreciate that there is minimal impact to Ashford Park Elementary's	
attendance zone.	
Very happy with the plan! We are in favor for the new plan outlined in Round 3 and that we will remain part	1
of the Ashford Park/Chamblee cluster. And our German Immersion remains intact	
as well as Ashford park.

Keep Ashford Park Community /Cluster together	12
We are very pleased with the proposed plan. The school district listened to our	
input and the Brookhaven Renaissance / Ashford Park neighborhood streets	
remain a park of the Ashford Park / Chamblee cluster. The recommended plan also	
satisfies the goal of relieving overcrowding in the Cross Keys cluster. The	
recommended plan is the best solution.	
We are very pleased with the staff recommended option. The option keeps	
communities together and protects the investment that students have made in the	
German Immersion program.	
We're happy that Gregory Run has been included in the new JLE redistricting plans!	
Parents in this community are committed to making this school a success.	
are community are committed to making this school a success.	
Yes, we approve of the staff recommendation! Thank you for keeping our school	
and neighborhood community intact!

Staff Recommended Plan - Cons	
Comment	Dots
Dresden gets no relief	6
Area H should be a split feeder	3
Next 2 years concern about students being moved from Chamblee to Cross Keys (no option for German Immerstion program)	2
The 22 students from Ashford Park would feel isolated and later on will have a	2
different High School	2
Diversity should be considered because it increases community involvement	2
Split feeders are a concern in short term (should be an option)	2
We don't want changes such as the ones in 2015	1
Brookhaven Heights is divided on Standard Dr Conlonial by current	1
attendance lines and on proposal	1
Trailers left @ Woodward & Montclair	
MS & HS changes were not included on update plans. How does the vision fit	
into MS & HS?	
Communicate short term vision for MS & HS	
Capacity of Cross Keys & Sequoyah gets highly impacted w/capacity	
AP @ 128 % JL is not at full capacity	
Not allowing diversity within the Cross Keys Cluster (Not keeping promise) to	
reconfigure cluster	
Doesn't serve promise of improving the diversity in the Cross Keys cluster. New	
School demographics are very homogeneous	
Didn't keep Skyland Estates intact with Drew Valley & Brookhaven Fields	
possibly all going to JLES.	
Split feeders should be considered.	
MS & HS changes w/feeder schools needs to be revisited (Ex. 14 HS & 8 MS)	
AP no relief even if new school is built	
I'm struggling to understand the portion of the conversation in this feedback	
section regarding Brookhaven Heights. I felt like my question/comment about	
traffic & neighborhood intact criteria was dismissed because it is currently	
divided. I feel like this redistricting process would do well to correct mistakes of	
the past, and I would like to know why it wouldn't be rectified?	
Cons is that it did split several communities, but again, not possible to avoid	
that with a new school located in existing attendance zones. Some will have to	
move.

Does not follow the criteria as laid out. Geographic proximity is not the main	D 013
criteria. If it were students within walking distance of John Lewis would attend.	
Brookhaven Heights Neighborhood is also divided between two ES. To leave the	
neighbor hood families listed for Woodward ES have to drive through the	
Ashford attendance area.	
7 tomor a accentance area.	
Given the unprecedented circumstances of a new school being built in another	
school's attendance zone - this plan is very good and serves to relieve the Cross	
Keys Cluster as it was originally intended to do. The only con is that APES loses	
the Skyland Estates neighborhood - but I know they are motivated to make JLE	
great!	
Great plan.	
I do wish that all APS families could stay together. Moving 22 seems	
unfortunate for their families.	
I support the proposed new map as is.	
I think that the middle and high school students who are being redistricted from	
Chamblee to the Cross Keys cluster should formally be allowed to stay at	
Chamblee since the CK cluster is very overcrowded. There is no need to add a	
single student to that cluster until the changes are made down the road to the	
HS and MS.	
I think the staff did an excellent job. I don't have any cons. Thank you so much	
for your hard work.	
Ignores majority of Brookhaven and desire to keep city/neighborhood intact;	
overwhelms existing elementary school/middle school in terms of student	
population and fails to allow brand new facility to reach instructional capacity	
It doesn't keep all of Ashford Park together.	
It looks good to me.

None	
None really!	
None that is we, this looks perfect and lines make sense.	
None.	
None.	
None.	
None. Great plan and should be implemented.	
Not too diverse as almost all of the higher class Ashford Park folks are staying	
together.	
NOTHING i think many people where extremely pleased with proposed map.	
Nothing for my neighborhood.	
Overcrowding at Ashford Park not addressed if only 22 students move to John	
Lewis. Small area to John Lewis which may mean possible Redistricting down	
the road again to fill the new school and continue to reduce overcrowding.	
Personally, I was hoping to see the brookhaven heights neighborhood	
combined into the same schools. Or at least all of standard drive. Our kids have	
friends on standard dr north of colonial and we live south of colonial. It makes	
no sense for them to be attending different public schools.	
Postpones overcrowding relief for Dresden ES for a year	
Proposed MS and HS change (Map sect H) further increases the enrollments for	
facilities that are already well above 100% Utilization. Area A residents request	
DCSD to NOT redistrict the MS and HS students at this time or not enforcing the	
1:1 feeder until the planned MS and HS construction projects are complete and	
the facilities have the capacity

Skyland Estates would be pulled out of the larger Ashford Park community that it has identified with for years and students would not go to school with friends in their immediate n'hood. Skyland Park requests to remain in school districts with the rest of Ashford Park or have more of Ashford Park rezoned along with Skyland Estates.	
The areas on non-contiguity (d, e, and the Montclair area below c) are odd and seem suspiciously gerrymandered. Brookhaven Heights is split, as it has been for some time, and this is to the detriment of the neighborhood and school involvement. This plan looks obviously drawn to accommodate Ashford Park.	
The gerrymandering makes no sense. Someone who could walk to Woodward is now being redistricted to Lewis?

The local neighborhood in which JRLES resides is under-represented (map sect	
A) with the proposed attendance lines by drawing only 20 local students into	
this brand new school. Continue to feed and relieve overcrowding from BuHi	
schools (wakefield forest, tanglewood, etc), but find a way to bring more	
students within 1 mile in.	
The local neighborhood in which JRLES resides is under-represented (map sect	
A) with the proposed attendance lines by drawing only 20 local students into	
this brand new school. Continue to feed and relieve overcrowding from BuHi	
schools (wakefield forest, tanglewood, etc), but find a way to bring more	
students within 1 mile in.	
The local neighborhood in which JRLES resides is under-represented (map sect	
A); only 20 local students into this brand new school. Continue to feed and	
relieve overcrowding from BuHi schools; find a way to bring more students ~1	
mile in. Proposed MS&HS change (Map sect H) further increases the	
enrollments for facilities that are 100% use.	
The neighborhood in which JRLES resides is hardly represented (only sect A)	
with the proposed attendance lines drawing very few area kids into its brand	
new school. Including only a sliver of APES zone into Lewis divides the	
neighborhood, limits diversity, and reduces the chances for the school to be	
successful/desirable for local residents .	
The only con I see is that zone E consists of walkers to Woodward, and they	
would not be able to walk to their new school.	
The plan excludes a small section of the original Ashford Park school community	
below Dresden street.	
The small pocket of Canmont, Stoland, and Boland that will move.	
There are a small number of middle and high school students impacted that are	
sent to more crowded schools - would be nice to allow them to remain in their	
current district as there are a very small number of folks impacted	
This plan does not relieve overcrowding of already-existing schools. The plan	
sends some students to a school that isn't the closest available option. The HS	
feeder plan unnecessarily increases capacity at HS that are overcapacity. This	
redistricting does not address the fundamental concerns of community	
members.

In the next redistrciting please do not touch AP	7
New school should have immersion language program	1
More schools in the cluster should have immersion language program	1
Can we explore a dual immersion plan (Spanish) - Principal on board	1
Communicate short & long term for MS & HS transition	
Community involvement is needed across schools	
Strong schools = Community involvement	
Clairmont Terrace, Tanglewood, Gregory Run -2/3 years expected growth. Is	
the data accurate? Estimated correctly?	
Parents are excited & ready to make the schools great!	
The wait has been worth the time JLES will benefit since they have been	
through a lot	
Families living in the AP community want to continue to go to APES. As a	
community we all would like our children to grow up together and attend the	
same elementary. The AP community would like to stay at APES and not be	
forced to JLES. Another option would be a split feeder for AP to go to APES or	
JLES	
Can you get rid of the Indians mascot?	
I think that it would be advantageous to explore a true dual immersion	
Spanish program at JLES. This would attract involved families to the school, as	
well as help the ESOL community. Dr. Brown would be a wonderful advocate	
for this program.	
The new redistricting maps support a case for gerrymandering because racial	
and demographic communities are clearly segregated. Ashford park has	
clearly been left out of the redistricting and given the close proximity to JLES,	
there's no reasonable argument for that. Brookhaven schools need to	
integrate across racial and economic backgrounds.	
1) Neighborhood & Community continuity. 2) Long term success of JLES. 3)	
Parent-involvement. 4)Increased diversity.	
A preK program at the new school	
Based on the proposed MS and HS changes, the students in Map sect H would	
be moved to schools that are not the closest facility and different from their	
friends residing in surrounding Brookhaven neighborhoods. Section H is	
closer to in proximity to Chamblee MS (8 min drive; 2.8 mi) v Sequoyah at 15	
min; 4.6 mi) and not in heart of Brookhaven	
min, 4.0 mil and not in heart of brookhaven	
Challange his staff to develop a plan that more closely aligns with the criteria	
and is not so obviously biased.	
Communities	

John D. Lauria Flansantam, Dadiatriatina Canana, mitu Faadhaal,

Communities are what makes schools great. Parent input as far as	D013
programming (language immersion, IB, etc) should be a big piece of forming	
this new community. A community-wide opportunity for all of the	
neighboring schools to support JLES (surrounding schools would love to help	
with forming PTAs, Foundation, etc at the new JLES). Consider that Tanglewood/Gregory Run NE families WANT to be in the JRL	
school. We don't want to have to move out of the district because we are	
forced to stay in Montcair. The economic benefits of keeping young families	
with young children in the new district would be a huge bonus to the City of Chamblee.	
Continue to support keeping Drew Valley and Ashford Park and its active	
community of interest together.	
Dresden is a VERY busy street and though not a city boundary, crossing it	
would cause significant traffic and safety issues for students.	
Helping to encourage (and provide support) to the surrounding schools so that	
they can help the new JLES get their community and school to the best	
possible place as quickly as possible	
I can only imagine how hard this decision is for you. Thank you for all of your	
consideration. I support the staff plan, as it keeps neighborhoods togehter.	
I feel like the board listened and has come up with a plan that a majority of	
the affected people will support and feel good about	
I support the new map as is.	
I think that it would be advantageous to explore a true dual immersion	
Spanish program at JLES. This would attract involved families to the school, as	
well as help the ESOL community. Dr. Brown would be a wonderful advocate	
for this program!	
JRLES needs to develop and promote special programs (i.e. foreign language	
immesion) for its attendees to increase its desirability among parents currently	
zoned into APES	
Just to allow the MS and HS students that are being redistricted to stay in	
Chamblee until the CK cluster no longer has an overcrowding issue.	
Otherwise, great job by the planning staff!	
Keep neighborhoods in tact to foster strong sense of community for	
elementary school.	
Keeping feeders in tact and listening to the stakeholders who will or could be	
impacted

Proposed MS and HS change (Map sect H) further increases the enrollments for facilities that are already well above 100% Utilization. Area A residents request DCSD to NOT redistrict the MS and HS students at this time or not enforcing the 1:1 feeder until the planned MS and HS construction projects are complete and the facilities have the capacity	
Public feedback from prior plans is very important to continue to consider	
Redistricting now should take into account redistricting that will occur next year for new elementary school, and limit disruptions to the current populations that are impacted by this redistricting effort. Room for growth at JRL is good - on Tanglewood/Clairmont Terrace	
neighborhood there will be around 30 kids of ES age in the next 2 to 5 years, and these kids will greatly benefit from being zoned to JRL.	
Safety and traffic flows should be moved up in priority. The original proposal #1 not only would have created worse traffic, it also would have been unsafe.	
Split feeders should be considered as an option	
Staff did great job of listening and implementing community input. Make sure not to revert back to prior options. Continue to consider intact neighborhoods, traffic/safety within the Ashford Park neighborhood, and impact on the APES German Immersion program.	
Sticking to the criteria (intact neighborhoods, traffic), consistency of programming - language immersion, etc.	
Thank you for engaging the community.	
Thank you for listening to the communities and taking their requests and opinions seriously. This suggested plan is fantastic and we appreciate you and all your hard work!	
The future of the kids affected. Siblings affected. Community bases who want to be together.	
The parents are Tanglewood/ Gregory Run are INVESTED AND WANT to be in the new John Lewis school, would like to have 3 year old + pk program, language immersion program, ESL,	
This does not take into consideration the german program, if those 22 student from APES are in german that does nothing to help APES crowding issues, as those spots cannot be filed by other studentshas this been evaluated.	
This plan looks great ooverall, thank you so much for your responsiveness to stakeholder feedback.	

tale Data Saffa and a Datha Saffa Community Familiant
