GUIDING PRINCIPLES

Balance school facility utilization
Make every effort to have equitable utilization (where possible) across the district and in accordance with school capacities and funded allotment ratios in accordance with state law. Make efficient use of available space.

Account for future growth
Allow for increasing attendance in high growth areas.

Establish clear feeder patterns and continuity
Make every effort to establish a clear feeder pattern system (especially from middle school to high school), although it may be necessary to split an elementary school to feed to two or more middle schools. Make every effort to divide a large enough population so students can continue to the next level with familiar faces.

Minimize impact on students
Attempt to minimize the amount of students impacted when making boundary adjustments.

Consider economic, cultural, and ethnic diversity
Ensure schools are inclusionary and not adversely affected by realignment decisions.

Close Proximity
Students should be assigned to the school within the closest proximity to their homes where possible.
