

60-Day Plan: Reflection and Progression

It's been 60 days since I started my journey to serve our community as superintendent. This remarkable experience has been filled with learning, growth, and inspiration. As we confront our challenges and continue Disrupting for Excellence, this will entail revisiting strategies and repositioning for greatness.

As I tour the District and meaningfully engage with our DeKalb Schools family, community partners, BOE members, and my number one priority, our scholars, I see our progression toward excellence and student success. As we continue implementing our Miracles Framework, I look forward to sharing how we align our work with the District's Strategic Plan.

Thank you for meeting and sharing with me at our Roundtable Discussions as we become H-Pride Certified, reading our weekly newsletters, and participating in our ThoughtExchange surveys. These engagements and interactions are indispensable. Your suggestions, opinions, and feedback matter because they help shape our essential work.

I look forward to working with you as we continue to transform into a District that serves, believes, and develops future leaders.

One student at a time.
