ACT
What are the challenges or obstacles you are facing or anticipating? What needs to change and/or improve to reach your performance targets? How will these changes lead to progress?

The department is faced with the following challenges:

- The number of males of color in DeKalb County School District have been disproportionately suspended. Administrators will utilize alternatives to suspension to address behavior issues and disproportionality by monitoring the classroom strategies used to improve behavior, decreasing the number of office discipline referrals, reducing the number of students placed in in-school and
out-of-school suspension, establishing My Brother’s Keeper local school groups and providing quarterly conferences with relevant topics, MTSS Response to Intervention (RtI), Positive Behavioral Interventions and Supports (PBIS), and Restorative Practices.

- During the 2016-2017 school year, these strategies have improved the total instances of students being suspended. There was a 16% decrease in the number of out-of-school suspensions, a 34% decrease in the number of in-school suspensions, a 33% decrease in the number of discipline incidents, and a 7% decrease in the number of bullying incidents for the District.
- Limited alternative educational facilities for students with behavior, academic, attendance, legal, and mental health challenges are available. Additional alternative educational facilities are needed to provide the proper educational setting and services for students’ identified challenges. The District is planning to open a new alternative school to address the needs of the DeKalb County student body that will provide additional wrap-around services to address the above-mentioned needs of DeKalb students.
